CAREER OBJECTIVE

Motivated MCA candidate specializing in Artificial Intelligence and Data Science, seeking a Python Developer role to build reliable, scalable software. Strong foundation in Python, OOP, data structures, SQL, and backend APIs, with hands-on experience delivering full-stack projects and ML prototypes. Eager to contribute to high-impact engineering teams by writing clean code, optimizing performance, and collaborating across functions.

TECHNICAL SKILLS

- Programming: Python, OOP, Data Structures and Algorithms
- Web: HTML, CSS, React.js (basics), Express.js.
- Databases: MySQL, MongoDB, SQL
- Frameworks/Tools: Flask, REST APIs, Git, GitHub, Streamlit, Vercel
- Concepts: Full-Stack Development, Basic Generative AI, NLP Fundamentals

EDUCATION

MCA, Basaveshwara Engineering College, Bagalkot | 2026 | CGPA: 9.25

BCA, Chetana BBA and BCA College, Vijayapura |2024 | CGPA: 89.05

PROJECTS

- Sentiment Analysis (Python, NLP, scikit-learn, NLTK, Pandas) [Link](#)
Built a sentiment classifier to label text as positive/negative/neutral using tokenization, stop-word removal, and traditional ML models. Engineered features, evaluated accuracy, and visualized results to compare model performance.
Keywords: text preprocessing, model training, evaluation metrics, data pipelines.
- Student–Teacher Friendly App (React.js, Node.js, Express.js, MySQL) [Link](#)
Developed a full-stack portal enabling teachers to upload notes/announcements and students to access resources securely. Implemented REST APIs, authentication, role-based access, and relational schema design to reduce communication gaps.
Keywords: RESTful services, authentication/authorization, CRUD operations, SQL schema design.

INTERNSHIP EXPERIENCE

- Python & Generative AI Intern, Upgrade Education PVT. Ltd., Bangalore | Feb 2026 – June 2026 (4 months)
Contributed Python automation utilities, explored GenAI concepts, and supported backend components focused on scalability and maintainability.
- Web Developer Intern, Info-Kshetra Technologies, Bagalkot | May 2024 – Jul 2024 (3 months)
Delivered a student–teacher portal with React/Node/Express/MySQL; designed REST APIs, secure login, and role-based access to streamline academic communication.

CERTIFICATIONS

- Pursuing: Course on Artificial Intelligence and Machine Learning, ISM Univ Bangalore

ACHIEVEMENTS

- 1st Prize, Paper Presentation: “AI-Powered Advocate Legal CaseBook” (₹3000 cash award)

STRENGTHS

- Problem Solving: Applies DSA and debugging to optimize code paths and query performance.
- Clean Code & Testing: Writes modular Python with attention to readability and basic unit testing.
- Database Design: Normalized schemas, efficient SQL queries, and indexing fundamentals.
- API Design: REST principles, request validation, error handling, and pagination basics.

SOFT SKILLS

- Communication | Collaboration | Adaptability | Time Management | Ownership mindset
