

SONALI BIDARKUNDI

Python Developer

Bengaluru, Karnataka | 9731608708 | sonalibidarkundi78@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

MCA candidate with a strong foundation in Python programming, object-oriented design, and backend development, seeking a Python Developer role. Hands-on experience building REST APIs, database-driven applications, and full-stack projects using Flask/Django, MySQL with additional exposure to data analysis (NumPy, Pandas) and Generative AI integrations. Quick learner with a focus on writing clean, maintainable code and shipping practical, production-ready solutions.

TECHNICAL SKILLS

- **Programming:** Python (Core Python to File Handling, OOP)
- **Backend & APIs:** Flask, Django (basics), REST API design & development
- **Databases:** MySQL, SQL, schema design
- **Data Libraries:** NumPy, Pandas, data preprocessing, feature engineering
- **Web & Tools:** HTML, CSS, React.js, Git, GitHub, Streamlit, Vercel
- **Generative AI:** Gemini API & Groq API integration, AI Assistant development, prompt engineering

EDUCATION

- **MCA, Basaveshwara Engineering College, Bagalkot** | 2026 | CGPA: 9.25
- **BCA, Chetana BBA and BCA College, Vijayapura** | 2024 | CGPA: 89.05

PROJECTS

College Chatbot – AI FAQ Assistant | Python, Flask/Django, Groq API, SQL Database [Link](#)

- Built an AI-powered chatbot using Retrieval-Augmented Generation (RAG) and the Groq API to answer student FAQs on admissions, timetables, courses, and campus information
- Designed a Flask/Django backend that retrieves relevant records from a SQL database and feeds them as context to the LLM, improving answer accuracy and reducing hallucination
- *Keywords for ATS: Retrieval-Augmented Generation (RAG), Generative AI, LLM Integration, Prompt Engineering, Flask, Django, SQL, API Design*

AI CRM – HCP (Healthcare Professional) Management App | Vite, Python Flask, MySQL, Gemini API [Link](#)

- Designed and built an in-app AI Assistant using Google's Gemini API within a full-stack CRM (Vite frontend, Flask backend, MySQL database) for HCP management.
- Handled prompt design and API integration so the assistant could interpret natural-language queries and streamline CRM workflows; engineered features and evaluated multiple models to select the best-performing approach.
- *Keywords: Generative AI integration, Flask REST API design, relational database design, model training & evaluation.*

Student–Teacher Friendly App | React.js, Node.js, Express.js, MySQL [Link](#)

- Developed a full-stack portal for teachers to upload notes/announcements and students to access resources securely, with REST APIs, authentication, and role-based access.
- *Keywords: RESTful services, authentication/authorization, CRUD operations, SQL schema design.*

INTERNSHIP EXPERIENCE

Python & Generative AI Intern, Upgrade Education Pvt. Ltd., Bangalore | Feb 2026 – June 2026 (4 months)

- Explored Generative AI concepts and built API-based AI integrations, contributing Python automation utilities and backend support focused on scalable, GenAI-ready components.

Web Developer Intern, Info-Kshetra Technologies, Bagalkot | May 2024 – Jul 2024 (3 months)

- Delivered a student–teacher portal with React/Node/Express/MySQL; designed REST APIs, secure login, and role-based access to streamline academic communication.

ACHIEVEMENTS

- 1st Prize, Paper Presentation: "AI-Powered Advocate Legal CaseBook" (₹3,000 cash award)

STRENGTHS

- **Clean Code:** Writes modular, readable Python with attention to maintainability and best practices.
- **Problem Solving:** Applies DSA and debugging skills to optimize code paths and performance.
- **Backend Development:** Builds REST APIs and database-driven applications using Flask/Django, MySQL, and MongoDB.
- **Full-Stack Delivery:** Ships features end-to-end — from backend logic and API integration to UI and database.
- **AI Integration:** Builds AI-assistant features into applications using GenAI APIs (Gemini, Groq) for real-world use cases.
